

1. Product and Company Identification

MATERIAL IDENTIFICATION: **Inland geminYe VAC 3**

MATERIAL USES: Lubricant Grease
COMPANY: Inland Vacuum Industries
35 Howard Ave
Churchville NY 14428
(585) 293-3330
VALIDATION DATE: 03/01/2016

2. Hazards Identification

Not classified as a hazardous substance or mixture according to the Occupational Safety and Health Administration (OSHA) Hazard Communication Standard 2012.

Other hazards

The product as such is not hazardous

3. Composition/information on ingredients

This product does not contain any components that require disclosure according to OSHA Hazard Communication Standard 2012.

4. First aid measures

Eye Contact

Check for and remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention if symptoms occur.

Skin Contact

In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Get medical attention if symptoms occur.

Inhalation

Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt, or waistband. Get medical attention if symptoms occur.

Ingestion

Wash out mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention if symptoms occur.

Protection for first-aiders

No action shall be taken involving any personal risk or without suitable training.

Note to Physician

No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

5. Fire-fighting measures

Suitable Extinguishing Media

Dry Chemical, CO₂, Foam. or Water Fog

Special Exposure Hazards

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Hazardous thermal decomposition products

Burning may produce gaseous hydrogen fluoride (HF), Fluorophosgene

Special protective equipment for firefighters

Fire-fighters should wear protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

6. Accidental release measures

Personal Precautions

No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protection equipment (see Section 8).

Environmental Precautions

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains, and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil, or air).

Methods for Clean up

Small spill: Move containers from spill area. Vacuum or sweep up material and place in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor.

Large spill: Move containers from spill area. Prevent entry into sewers, water courses, basements, or confined areas. Vacuum or sweep up material and place in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor.

7. Handling and storage

Handling

Put on appropriate personal protection equipment (see section 8). Eating, drinking, and smoking should be prohibited in areas where this material is handled, stored, and processed. Workers should wash hands and face before eating, drinking, and smoking. Remove contaminated clothing and protective equipment before entering eating areas.

Storage

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool, and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

8. Exposure controls/personal protection

Recommended Monitoring Procedures

If this product contains ingredients with exposure limits, personal, workplace, atmosphere, or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment.

Engineering Measures

No specific ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.

Hygiene Measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking or using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Respiratory

Use properly fitted, air-purifying or air fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Hands

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Eyes

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposures to liquid splashes, mists, or dusts.

Skin

Personal protection equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Environmental Exposure Controls

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements or environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

9. Physical and chemical properties

Physical State	Semi-solid, grease
Flash Point	Not Available
Auto-ignition Temperature	Not Available
Flammable Limits	Not Available
Color	White
Odor	Nearly odorless
pH	Not Available
Boiling/condensation Point	Not Available
Melting/freezing Point	Not Available
Density	1.8-2.0 g/cm ³
Vapor Pressure	Not Available
Vapor Density	Not Available
Volatility	Not Available
Evaporation Data	Not Available
Viscosity	Not Available
Dispensability Properties	Not Available
Solubility	Insoluble in the following materials: hot and cold

Physical/chemical Properties Comments

water
Not Available

10. Stability and reactivity

Chemical Stability	The product is stable
Conditions to avoid	No specific data
Incompatible Materials	No specific data
Hazardous Decomposition Products	Under normal conditions of storage and use, hazardous decomposition product should not be produced.
Possibility of Hazardous Reactions	Under normal conditions of storage and use, hazardous reactions will not occur.

11. Toxicological information

Acute Toxicity: None known	
Chronic Toxicity	Repeated or prolonged exposure to spray or mist may produce respiratory tract irritation.
Irritation/Corrosion	Skin: No known significant effects or critical hazards. Eyes: No known significant effects or critical hazards. Respiratory: Repeated or prolonged exposure to spray or mist may produce respiratory tract irritation.
Sensitizer	Skin: No specific information is available regarding the skin sensitizing properties of this product. Sensitization not expected for humans. Respiratory: Sensitization not expected for humans.
Carcinogenicity	There is no data on the preparation itself. Carcinogenicity not suspected for humans.
Mutagenicity	There is no data on the preparation itself. Mutagenicity not suspected for humans.
Teratogenicity	There is no data on the preparation itself. Teratogenicity not suspected for humans.
Reproductive Toxicity	There is no data on the preparation itself. Not considered to be dangerous to humans.

12. Ecological information

Ecotoxicity	Not readily biodegradable
United States	
Aquatic Ecotoxicity	There is no data available on the preparation itself
Persistence/Degradability	This product has not been tested for biodegradation. Not readily biodegradable. This product is not expected to bioaccumulate through food chains in the environment.
Canada	
Aquatic Ecotoxicity	There is no data available on the preparation itself
Persistence/Degradability	This product has not been tested for biodegradation. Not readily biodegradable. This product is not expected to bioaccumulate through food chains in the environment.
Mexico	
Aquatic Ecotoxicity	There is no data available on the preparation itself
Persistence/Degradability	This product has not been tested for biodegradation. Not readily biodegradable. This product is not expected to bioaccumulate through food chains in the environment.

13. Disposal considerations

Waste Disposal

The generation of waste should be avoided or minimized wherever possible. Significant quantities of waste product residues should not be disposed of via the foul sewer but processed in a suitable effluent treatment plant. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions, and any by-products should at all times comply with the requirement of environmental protection and waste disposal legislation and any regional or local authority requirements. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may contain some product residues. Avoid dispersal of spilled material and run-off and contact with soil, waterways, drains, and sewers.

Disposal should be in accordance with applicable regional, national, and local laws and regulations Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE LIMITS AND PERSONAL PROTECTIVE EQUIPMENT for additional handling information and protection of employees.

14. Transport information

Regulatory Information	UN Number
DOT Classification	Not Regulated
TDG Classification	Not Regulated
Mexico Classification	Not Regulated
ADR/RID Class	Not Regulated
IMDG Class	Not Regulated
IATA-DGR Class	Not Regulated

15. Regulatory information

United States	
HSC Classification	Not Regulated
TSCA 8(a) IUR Exempt/Partial Exemption	Not Determined
United States Inventory (TSCA 8b)	All components are listed or exempt
Clean Air Act Section 112(b) – Hazardous Air Pollutants (HAP'S)	Not listed
SARA 313: No listed substances	
Canada	
WHMIS (Canada)	Not controlled under WHMIS (Canada)
Canadian NPRI	None of the components are listed
CEPA Toxic Substances	None of the components are listed
Canada Inventory	All components are listed or exempted

16. Other information

The customer is responsible for determining the PPE code for this material.

NFPA:

Flammability

HMIS III:

Special hazard.

HEALTH	1
FLAMMABILITY	0
PHYSICAL HAZARD	0

0 = not significant, 1 =Slight,
 2 = Moderate, 3 = High
 4 = Extreme, * = Chronic

Revision Date : 03/01/2016
