Positioning Systems for Science and Industry

## **Velmex Versatility**

#### **Table of Contents**

Velmex positioning products provide a variety of precise, yet simple, modular configurations to satisfy a broad range of applications where high precision and value are essential. Velmex applications are limited only by your imagination. For example:

- Measurement
- Antenna Alignment
- Automation
- Camera Positioning
- Film and Animation Work
- Inspection and QA/QC
- Medical And Biological Analysis
- Moving Probes, Sensors, Components
- Optical Focusing
- Photonics
- Pick and Place
- Prototyping
- Research and Testing
- Workhold Fixturing and Light Industrial
- And thousands of other uses.

You are not limited to off-the-shelf items. Every Velmex product is built to order. We can customize your device to meet your exact requirements with:

- Locks
- Counters and Scales
- Position Encoders
- Special Finishes
- Prep for Special Environments
- Framing
- Plates and Brackets

Velmex's very broad range of positioning equipment for science and industry delivers quality, precision, selection and value.

# **Rotary Table Assemblies**

Manual versions of the A4800 and A5990 Series Rotary Tables

Velmex Rotary Tables deliver precise, continuous rotating motion for scanning, assembly, testing and production. They are a convenient, accurate method of quickly positioning a payload. The tables use a rugged worm and gear drive design with a central rotating ball bearing.

Velmex offers two series of Rotating Tables in manuallydriven or motorized configurations – the A4800 (B4800 - motorized) in three different gear ratios (18:1, 36:1 and

A manual (A4800) and a motorized (B4800) Rotary Table in a black anodized finish.

72:1) and the A5990 (B5990 - motorized) with a 90:1 gear ratio.

The A4800/B4800 Series of Rotary Tables has a load capacity up to 200 lbs. (90.7 kg.) horizontally and 25 lbs. (11.3 kg.) vertically. The A5900/B5990 can handle 50 lbs. (22.6 kg.) horizontally and 5 lbs. (2.3 kg.) vertically. They easily integrate with Velmex UniSlides<sup>®</sup>, BiSlides<sup>®</sup> and XSlides<sup>™</sup> in a array of configurations.

Positioning Systems for Science and Industry

#### **Rotary Table Configurations - Manual and Motorized Stages**

A48 Series of Manual Rotary Tables. Three models with gear ratios of 18:1, 36:1 and 72:1.

A59 Series Manual Rotary Tabe with a 90:1 gear ratio.

The motorized B59 series can handle up to 50 lbs.

Three models in the B48 Series can handle loads up to 200 lbs.

### **Rotary Table Applications**

Typical applications for Velmex Rotary Tables include mounting and rotation of test specimens, cameras, transducers, sensors, mirrors and other components. The tables can also be used to tilt and pan.

Rotary Table Specifications						
Rotary Tables <sup>†</sup>		A4818TS / B4818TS	A4836TS / B4836TS	A4872TS / B4872TS	A5990TS / B5990TS	
Gear Ratio		18:1	36:1	72:1	90:1

#### Velmex Rotary Table Options and Accessories

**Rotating Table Adapter Plates** – to mount Velmex Rotary Tables to other Velmex Assemblies either in horizontal or vertical positions.

XZ Brackets – allow Rotary Tables to be positioned vertically. They can mount two Rotary Tables at right angles. The brackets can also be used as the base and support to mount other Velmex products or the payload on the Rotary Table vertically.

Platform shelf – A right angled bracket designed to be used with UniSlide® Elevating Tables. However, they also can be used with vertically mounted Rotary Tables to support a payload. The shelf can be inverted depending on the motion required.

**Thumbscrew Lock (-TL)** – An easy method to lock the table utilizing a simple thumbscrew.

*Alternative Knob* – An knob with a crank for faster rotation is available for the A5990TS. Standard configuration is the knob only.

Home Switch – A magnetic reed home switch sets and returns the carriage to home (starting) position. This is moveable. (Available on motorized only.)

Limit Switches – Using two zeroreference (home) switches on a Rotary Table creates limits that restrict travel to a specific degree arc.

**Finishes** – The A48 Series of Rotary Tables has a brushed aluminum finish. Optional finishes are available.

Encoders and VRO<sup>™</sup> Encoder Readout – For a high resolution position readout a rotary encoder and Velmex's VRO encoder readout can be mounted to Velmex Rotary Tables.

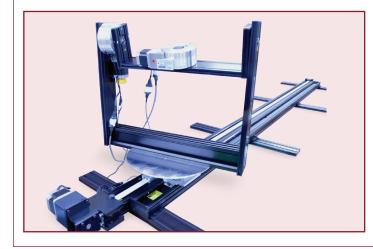

Motors and Motor-Controllers – A variety of motors are available to power Velmex Rotary Tables, most popular is the DC step motor. Step motors coupled with a motor controller like the Velmex VXM™ are a cost effective solution for accurate speed and precise incremental positioning.

Motorized / Manual Operation – It is possible, using a double shaft motor, to produce a Velmex rotary stage that can be manually operated or motor-driven. A shaft extension accommodates the either a Rogan or standard aluminum knob. It is also relatively easy to change out a manual knob for a motor on Velmex Rotary Tables.

Velmex Rotary Table combined with an BiSlide® Gantry System – Rotary Tables can easily be combined with other Velmex products to make custom systems for specialized motion and positioning projects. (The indexing system to the left also included Velmex framing components.)

#### More Positioning Solutions from Velmex

Velmex manufactures standard and custom linear and rotary motion-control positioning equipment for scientific, research, machining and industrial applications. Velmex produces UniSlide<sup>®</sup>, BiSlide<sup>®</sup> and XSlide<sup>™</sup> manual and motor-driven assemblies; manual and motor-driven XY tables, rotary tables, elevating tables and turntables; VXM<sup>™</sup> motor controls and VRO<sup>™</sup> digital readouts. Products include slides, stages and actuators in a variety of configurations and a broad range of sizes and payload capacities.

> Velmex UniSlide<sup>®</sup> Assemblies are available in a variety of configurations, models and sizes including Linear Slide Assemblies, Elevating Tables and XY Tables.

Velmex BiSlide® Assemblies offer durable, easy-to-configure, low cost and modular design for a highly effective and very versatile positioning device.

Velmex XSlide<sup>™</sup> Assemblies are compact positioning stages, highly suitable for high performance scanning of smaller loads. They are very effective in limited space applicaitons.
